Sharmaatharv7463@gmail.com | 93177-10077

Aspiring AI/ML engineer with a strong foundation in computer science, eager to apply machine learning, deep learning, and data analytics to solve real-world problems. Passionate about innovation, research, and developing intelligent solutions for scalable and impactful applications.

PROJECTS

A food delivery app

2026 – PRESENT

This project is a simple food delivery app for local areas. Small restaurant owners can register their shops and list food items. Customers can browse nearby restaurants, place orders easily, and get food delivered. It helps local businesses grow and makes ordering food more convenient
